

CONNECT

Basic Wireless

Designed to cater to the needs of lower capacity bandwidth, specifically small businesses as well as retailers. Connect Basic offers the rudimentary connectivity necessary for establishing a robust wireless service.

This broadband product is designed for the budget-conscious market, is easily upgradable and includes Internet Access.

Add Basic Wireless to existing fibre solutions to give your customers the benefit of improved SLA's during fibre failures or load shedding. Basic Wireless is ideal for deployment in an SD-WAN environment.

Service contracts are available in short-term and long-term options.

Basic Wireless

Equipment	Point-to-Multit-Point
Service	Strictly Layer 3
